

Varifund Variable Annuity Monthly Performance Summary

- Current performance may be lower or higher than performance data shown. Performance data quoted represents past performance and is not a guarantee or prediction of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be more or less than their original cost.
- Money market portfolios are not insured or guaranteed by the FDIC or any other government agency. Although these portfolios seek to preserve the value of your investment at \$1.00/share, it is possible to lose money by investing in these funds.
- Please consider the investment objectives, risks, fees and expenses carefully before investing. For this and other important information you may obtain prospectuses for the annuity contract's underlying funds and/or disclosure documents from your registered representative. Read them carefully before investing.

¹ Foreign investments involve special risks, including currency fluctuations and political developments.

² Equity securities of companies with relatively small capitalization may be more volatile than securities of larger, more established companies.

³ Sector funds may experience greater short-term price volatility than more diversified equity funds, and are most suitable for the aggressive portion of an investment portfolio.

⁴ There is a risk that the cost of borrowing money to leverage will exceed the returns for the security purchased or that the security purchased may actually go down in value; thus the portfolio's net asset value can decrease more quickly than if the portfolio had not borrowed.

⁵ Emerging growth companies may be subject to more abrupt or erratic market movement and may involve greater risks than investments in other companies.

The above returns represent hypothetical performance based on historical performance of the underlying funds. The performance is based on the performance of the policy's funding vehicles, which were in existence prior to its inception. The performance from these dates is derived by reducing the actual performance of the underlying fund by the charges of the Varifund VA product if it had been in existence. These figures reflect the fund operating expenses and the mortality and expense fee of 1.40%. Product charges, which would reduce performance numbers shown, are not included in these returns. ² Equity securities of companies with relatively small capitalization may be more volatile than securities of larger, more established companies.

³ Sector funds may experience greater short-term price volatility than more diversified equity funds, and are most suitable for the aggressive portion of an investment portfolio.

⁴ There is a risk that the cost of borrowing money to leverage will exceed the returns for the security purchased or that the security purchased may actually go down in value; thus the portfolio's net asset value can decrease more quickly than if the portfolio had not borrowed.

⁵ Emerging growth companies may be subject to more abrupt or erratic market movement and may involve greater risks than investments in other companies.

Some of the portfolios have been established by investment advisers which manage publicly traded mutual funds having similar names and investment objectives. While some of the portfolios may be similar to and may in fact be modeled after publicly traded mutual funds you should understand that the Portfolios are not otherwise directly related to any publicly traded mutual fund. Consequently, the investment performance of publicly traded mutual funds and any corresponding Portfolios may differ substantially.

The above returns represent hypothetical performance based on historical performance of the underlying funds. The performance is based on the performance of the policy's funding vehicles, which were in existence prior to its inception. The performance from these dates is derived by reducing the actual performance for the underlying fund by the charges of the Varifund VA product if it had been in existence. These figures reflect the fund operating expenses and the mortality and expense fee of 1.40%. Product charges, which would reduce performance numbers shown, are not included in these returns. The contracts have been offered to the public only since July 22, 1988.
