G - Closed to New Investors

BOND A bond fund's yield, share price and total return change daily and are based on changes in interest rates, market conditions, economic and political news, and the quality and maturity of its investments. In general, bond prices fall when interest rates rise and vice versa.

BALANCED Asset allocation and balanced investment options are subject to the risks of the underlying funds, which can be a mix of stocks/stock funds and bonds/bond funds. Stock values fluctuate in response to the activities of the general market, individual companies and economic conditions. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. In general, when interest rates rise, bond values fall and investors may lose principal value.

INTERNATIONAL Foreign investments involve special risks, including currency fluctuations and political developments.

MID CAP Equity securities of medium-sized companies may be more volatile than securities of larger, more established companies.

SPECIALTY Specialty funds invest in a limited number of companies and are generally non-diversified. As a result, changes in market value of a single issuer could cause greater volatility than with a more diversified fund.

Fund Footnotes

Columbia VP Seligman Global Tech 1

Foreign investments involve special risks, including currency fluctuations and political developments.

PRESTIGE Selected Investment Options as of 08/31/2018

These portfolios are designed especially for annuity and insurance products and, in most cases, are modeled after comparably managed funds offered by the fund families outside the insurance product. When you purchase a Key Business InsuranceSM product, you do not directly purchase shares in the portfolios. You invest in sub-accounts of a Great-West Life Annuity Insurance Company separate account that in turn, invest in the portfolios you've selected. Your account is then credited with variable accumulation units in that sub-account.

The fees and charges associated with the sub-accounts and the terms and conditions of your investment are detailed in your Key Business Insurance private placement memorandum.

Some of the portfolios have been established by investment advisers which manage publicly traded mutual funds having similar names and investment objectives. While some of the portfolios may be similar to and may in fact be modeled after publicly traded mutual funds you should understand that the Portfolios are not otherwise directly related to any publicly traded mutual fund. Consequently, the investment performance of publicly traded mutual funds and any corresponding Portfolios may differ substantially.
